Armchair Interviews

A Bittersweet Seduction

Two avatars travel east, hoping to shed the responsibilities laid upon them by their murdered god . . . A sildin general leads a small band of assassins south, intent on securing the borderlands before mounting his own military coup . . . A young woman, displaced by civil war moves deeper into the Blue Mountains, seeking vengeance on those who killed her family and destroyed her home.

They come with separate missions and secret motives, yet all their paths are inexorably drawn to the gateway that is the Wistrix Donn. Beyond the gateway lies the greatest mystery of all—a mystery that may consume them all.

DeVries stylishly blends stunning action sequences and unique characters in this panoramic fantasy epic.
